SUMMARY

Innovative AI & Machine Learning Specialist with 6+ years of industry experience developing state-of-the-art NLP pipelines, sem

CORE COMPETENCIES

AI & NLP: Natural Language Processing, Machine Learning, Deep Learning, Transformers, BERT, LLMs, Text Mining, Vector D
Languages: Python, C++, SQL, Bash
Frameworks: PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, Keras, FastAPI, Flask
DevOps & Cloud: Docker, Kubernetes, AWS, GCP, MLflow, Git, CI/CD

EXPERIENCE

Lead Machine Learning Engineer | DeepCognition Labs (2020 â Present)
- Engineered large-scale NLP information extraction pipeline utilizing PyTorch, Hugging Face Transformers, and BERT.
- Deployed high-throughput semantic similarity and vector retrieval engines using Scikit-learn and FAISS.
- Supervised end-to-end model training, validation, and containerized deployment with Docker and Kubernetes on GCP.

Senior Data Scientist | DataVenture Analytics (2018 â 2020)
- Designed machine learning classification and sentiment analysis algorithms using Python, Scikit-learn, and Pandas.
- Fine-tuned transformer models for biomedical entity recognition with 94.2% F1 score.

EDUCATION

Master of Science in Artificial Intelligence & Computer Science | Columbia University (2016 â 2018)
Bachelor of Technology in Computer Engineering | IIT Delhi (2012 â 2016)
